GST Smart Manager

Simplifying GST, Empowering Business

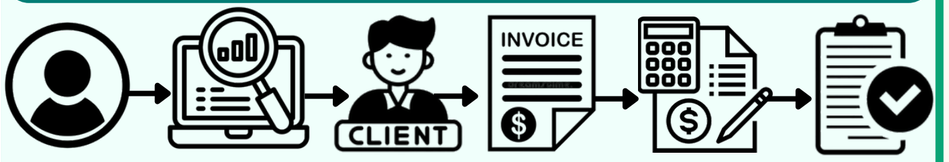
Problem Statement:

- Small and medium businesses face difficulty in managing GST billing, invoices and tax calculations manually.
- Existing solutions are either complex or expensive, leading to inefficiency and errors in financial tracking.

Objectives:

1. To automate GST calculations (CGST, SGST, IGST).
2. To manage clients and invoices efficiently.
3. To generate financial reports and GST summaries.
4. To support multiple businesses within a single application.

WorkFlow:



Login/ Signup → Dashboard → Clients → Invoices → GST Calculation → Reports
